Technical Skills

Programming Languages: Java, JavaScript, Python, C
Frontend Technologies: ReactJS, Redux Toolkit, Tailwind CSS, HTML, CSS3, Bootstrap
Backend Technologies: Node.js, Express.js, Socket.io
DataBase: MongoDB, Mongoose, SQL
Other: REST APIs, JWT Auth, Axios, OOPs, Clerk Authentication & Authorization, Sentry Monitoring
Version Control & tools: Git, Github, Postman, Vercel, Render, MongoDB Atlas
Soft Skills: Leadership, Presentation Skills, Writing, Problem Solving, Time Management

Internship

HAEGL TECHNOLOGIES PVT LTD | Web Development Intern

- Developed and maintained both **frontend** and **backend** components using React.js, Node.js, and Express.js.
- Integrated APIs for improved data management and user experience.
- Collaborated with senior developers to design and implement new features for multiple web applications.
- Optimized application performance by reducing API response time by 10%.

Projects

Eventify — Event Booking Platform : [Live](#)

- Built a full-stack event booking platform with **Role-Based Authentication** (Admin/User) using React.js and Node.js.
- Developed **Admin Dashboard** to create/delete events and manage booking requests with payment status tracking.
- Implemented **JWT-based** secure authentication with OTP email verification using **Resend API**.
- Designed RESTful APIs with Express.js and MongoDB for event management, bookings, and user management.
- Integrated **MongoDB Atlas** for cloud database management and persistent data storage.
- Deployed frontend on **Vercel** and backend on **Render** with production-ready **Cloud Deployment** configuration.

Real-Time Chat Application : [Live](#)

- Built a full-stack real-time chat application using **MERN** stack for instant messaging between users.
- Implemented **JWT authentication** for secure login, signup, and protected routes.
- Integrated **Socket.io** for real-time messaging and online user status tracking.
- Designed responsive UI using **Tailwind CSS and DaisyUI**.
- Deployed the application on **Render with production-ready configuration**.

Job Portal Website: [Link](#)

- Built a Full Stack Job Portal using **MongoDB, Express, React, and Node.js**, enabling users to search and apply for jobs.
- Developed a recruiter dashboard to post jobs, manage listings, review applications, and accept/reject candidates.
- Managed application state efficiently using **Redux Toolkit** for better scalability and performance.
- Implemented user **authentication** with Clerk, allowing users to create profiles and upload resumes.

Education

B.E Computer Science

Jain College of Engineering & Technology

Aug 2020 – Jun 2024

Hubli, Karnataka

PUC (12th)

KLE PC Jabin Science College, Vidyanagar

Jun 2018 – Mar 2020

Hubli, Karnataka

Rotary English Medium School (SSLC)

Secondary Education (KSEEB Board)

April- 2018

Hubli, Karnataka
